Tools: Microsoft Power BI, Power Automate, MySQL, SQL Server, Python, MS Office, Power BI Services

Skills: Data Visualization, Data Analysis, Debugging, Requirement Gathering, Reporting, Business Intelligence, Decision-Making, Data Management, Statistical Analysis, Data Modeling, Wireframing & Dashboard Design, Problem Solving

Experience

Senior Analyst, Capgemini India Pvt Ltd.

July 2022 – Present

- Expertise in **data gathering** from various data sources, analyzing patterns, and crafted built over **40 engaging dashboards** and reports to drive business growth and decision-making.
- Performed comprehensive data **extraction, transformation, and loading (ETL)** processes using **Power Query and SQL** to ensure data accuracy, consistency, and reliability for reporting resulting in a **99% data integrity** rate for reporting.
- Translated raw data into informative reports and visuals, collaborating with cross-functional teams to create interactive dashboards that **reduced reporting time by 20%** and met diverse business requirements.
- Collaborated with **stakeholders** to gather business requirements, translate them into technical specifications, and deliver tailored analytical solutions that meet organizational needs.
- Implemented and optimized **DAX measures** and **calculated columns** to create complex calculations, aggregations, and time-intelligence functions, enhancing report functionality and performance.
- Provided end-user training and support to **over 50 individuals** on Power BI reports and dashboards, fostering data literacy and empowering users to leverage self-service analytics capabilities.
- Developed and publish Power BI reports to the **Power BI Service**, ensuring timely **data refreshes** and **accessibility**.
- Worked on over **5+ predictive models** to **forecast trends**, providing clients with foresight into business dynamics.

Personal Projects

Maven Sales Challenge - Power BI

- Developed an interactive dashboard using **Maven CRM dataset** to track key sales metrics, analyze team performance, and identify improvement areas.
- Created a Calendar table for time-based analysis, ensuring accurate revenue trends, team performance etc to support **strategic decision-making** and improve operational efficiency.

Maven Restaurant Challenge – Power BI

- Designed interactive Power BI dashboards to analyze key metrics like cancellation rates, booking lead times, menu offerings, and optimizing pricing strategies, leading to improved decision-making and a **25% reduction in inefficiencies**.
- Analyzed booking data with SQL and Excel, identifying key booking trends and cancellation patterns, and providing data-driven recommendations, including overbooking strategies, to optimize revenue and operational efficiency.

Certifications

- IBM Data Analyst Professional Certificate (Coursera)
- Microsoft Power BI Desktop for Business Intelligence (Udemy)

Education

B. Tech in Information Technology, MAKAUT

CGPA: 8.63

2018 – 2022
